#### Rationale:

Contextualized learning resources help learners achieve high academic performance. Learners will be able to scaffold their own understanding through the use of varied instructional materials related to their experience. Thus, the need to develop contextualized learning materials is one of the primary goals of LRMS to support curriculum implementation.

In view of this, DepEd Bohol through the Learning Resource and Development Section (LRMS) will conduct a workshop on the digitization of the locally-developed learning materials. This activity envisions producing digitized learning resources that supports curriculum localization.

The course of this activity also aims to help all identified illustrators master their potential and abilities to design, illustrate, enhance, and digitize materials related to curriculum instruction.
